

**ACRYLAC®**

## Fit 10T0606

Freshen-up spray for water-based coatings

### Range of Applications

Reduces tack of coating on rollers, rubber blanket, and plate after short press stops. Prevents substrate from sticking when press is restarted after a short idle times. Reduces washing times.

Use the pump sprayer to apply to rubber blanket, plate, and rollers before printing continues. On short stops, the reduced tack of the coating enables the press to restart without washing.

### Safety

According to the Ordinance on Hazardous Substances: none

According to the Ordinance on Flammable Liquids: none

MSDS is available upon request. Please refer to the contact of your local supplier.
